FOREWORD

AN ARTIST cannot hope to recapture fully the beauty of a sunset or the brilliance of a star-studded sky; nor can we hope to recapture completely the thrills of our high school days on the hill. This "PANORAMA OF SCIENCE" is our feeble attempt to recall to your memory the cherished moments of this marvelous year.

DEDICATION

To a person who has enlightened our paths and helped make our life at Radford High School one that shall always linger in our hearts. She came to R.H.S. five years ago and with her warm smile and understanding manner she immediately became a friend to us all.

As sponsor of the Oak Leaf, she has made each annual a part of her and toiled many hours to make it one that we are all proud to receive.

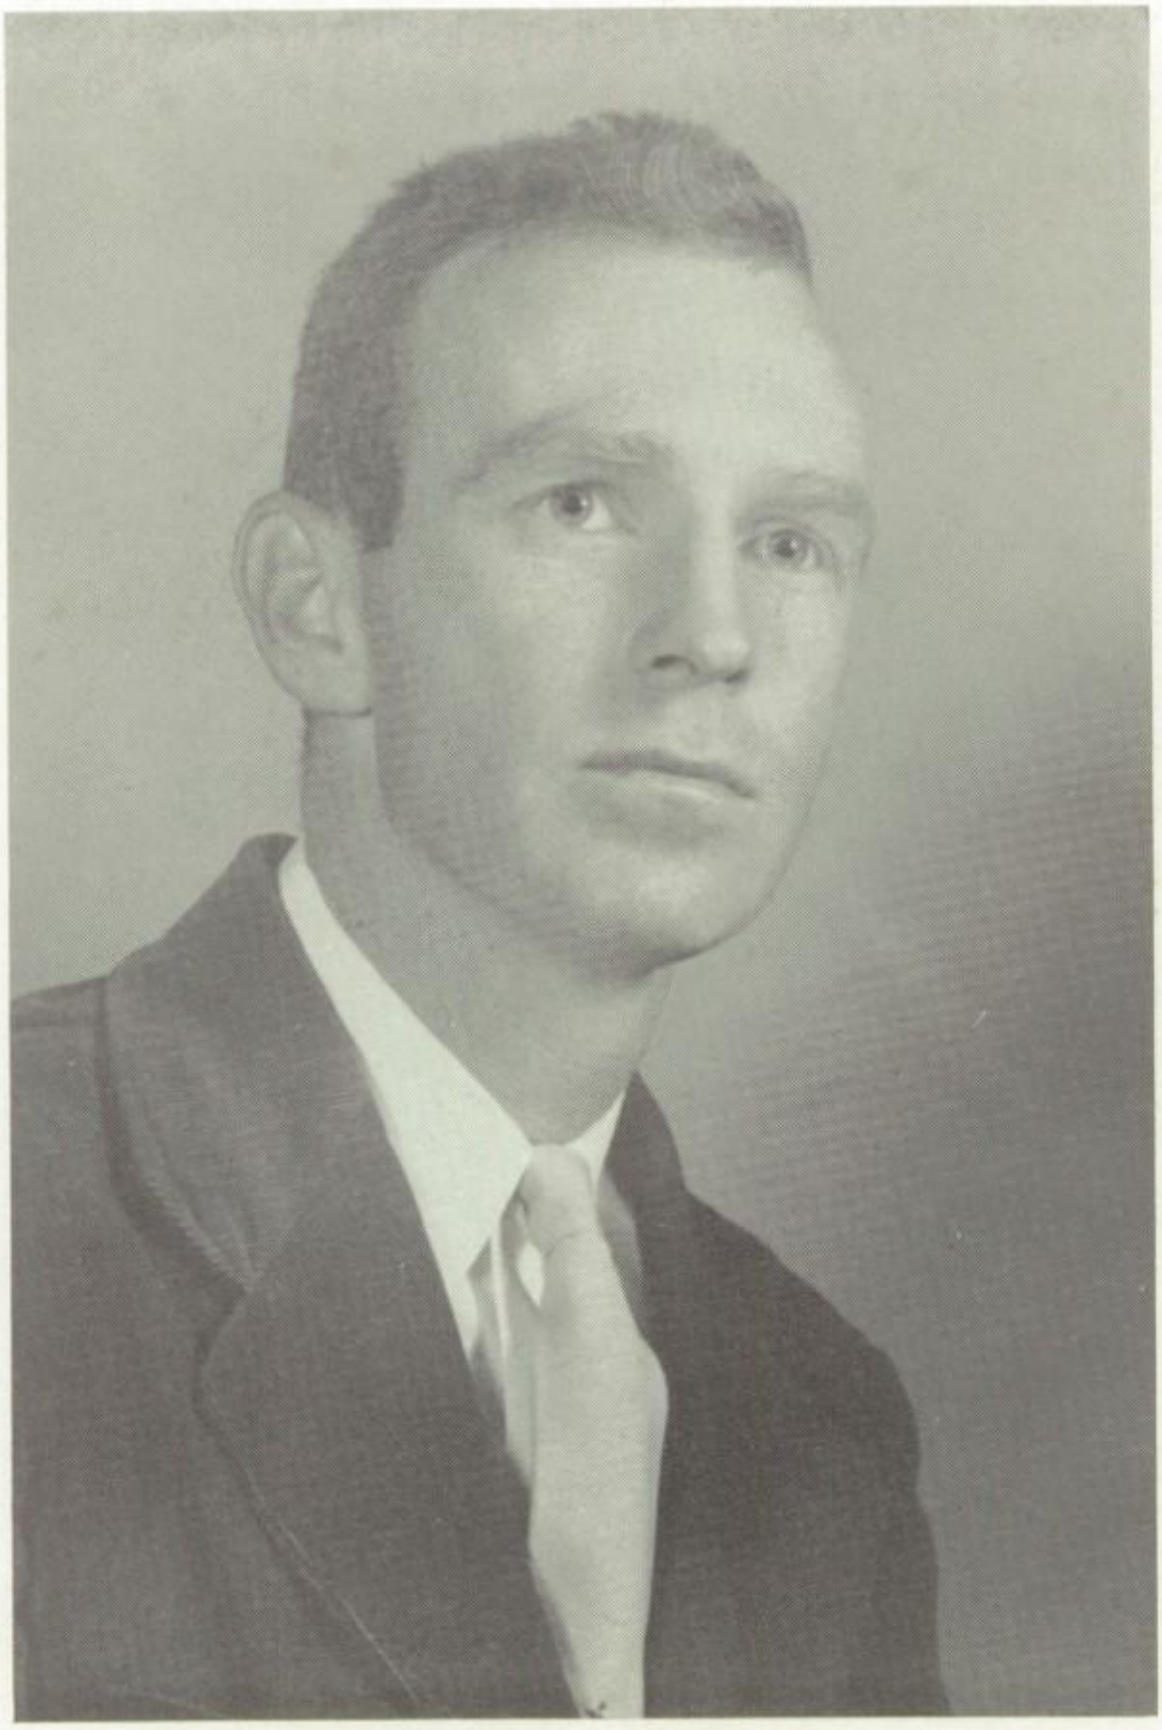
As a small token of appreciation to the person we hold in highest esteem, we dedicate the 1951 edition of

THE OAK LEAF

to

Mrs. Rubye Wade

We Honor



H. H. (*Happy*) Hobgood

We'd like to say, "Thank you", to a man who has contributed much to the athletic and scholastic life of Radford High School. As a coach he has built teams that we're proud of, and as a teacher he has built leaders that will show their worth in years to come.

Next year, he will not be with us, but our admiration and affection will be with him wherever he is.

CLASS HISTORY . . .

We were probably overlooked by the astronomers who spend their time searching the sky for new stars, and new planets; for we were ninety nebular bodies who slipped into our places among the luminous stars of Radford High School. We felt that we were unimportant, so we faded into the background and waited patiently through the "Light Years" for our chance to shine.

Mary Ward Tilley was elected to guide us through the clouds of insecurity, which seem to close around. We emerged from these clouds to find that the year had been filled with glorious events upon which we could build memories. The Bobkittens won their first district championship and the Bobcats won second place in the state placements.

By 1948 we began to see the "light" and to feel that the "Star Studded Sky" was brightened by our presence. Darrell Wilson led us through the haze of our Freshman year. Again the Bobkittens won the district championship. Our memories were accumulating.

In 1949 we began to constellate with Karen Barnett charting our course. A new world seemed to open for us. We became necessary to the Solar System of Radford High. Five self-luminous stars became a part of the galaxy when the Beta Club invited Ann King, Mary Ward Tilley, Dick Zimmerman, John Rutherford and Sonny Sutphin to become charter members. The Bobcats won the State Championship and the Bobkittens again gained district honors. We were marching to spectacular triumphs.

We grew in brilliance, and the grandeur of 1950 was heightened by preparations for the Junior-Senior Prom. Tom Smith steered us through this significant Junior Year. We spent much time and energy preparing food and selling it at the games. We often looked like "shooting stars" as we flitted from one chore to another.

We were whisked through space, and "Leo" announced Spring. Preparation for the Prom took an important place in our minds. Can we ever forget the celestial assemblage that visited the "Southern Plantation" which we erected in the gymnasium? Diana, the goddess of the moon, smiled on us, and the starry figures who danced to the music of Lock Lowman's Orchestra sparkled with happiness and contentment.

No eclipse darkened this year; for we earned a "distinguished" rating in the district *and* the state play festival with our one-act play, "Submerged."One member of our class, Dick Zimmerman, played a role in this successful production. We were hosts to the All State Band West and had participants in this musical event. We read at the literary festival, we debated, and we participated in several oratorical contests. This was a busy year. We blazed across the sky of triumph and realized that we could compare ourselves with Saturn by ordering our rings. We were moving swiftly across the "sky" of success.

By 1951 our brilliance outshone that of all the others. We selected Johnny Cormell to guide us. Unfortunately he was unable to stay with us; so Darrell Wilson again took the lead, and we found ourselves in the starry scene of our Senior year. Our rings came! We were full-fledged Saturns. Homecoming was a great success; for Bill Deck, the President of the Student Cooperative Association, planned the parade well. Although Byrd was victorious, our Bobcats showed the same fine spirit of good sportsmanship that was characteristic of them. Lois Jones and Shirley Nelson reigned as Football King and Queen of 1950.

Some of our boys became "wandering stars" and joined the armed forces; however the "fixed stars" continued to work and plan and grow more luminous.

We sent the annual to press, we ordered calling cards and invitations, we presented our Senior play, we dedicated the Oak Leaf, we had our Senior Assembly.

The Juniors transformed the gymnasium into "Club '51" and filled us with celestial memories of a "heavenly" prom. The civic clubs entertained us with wonderful parties.

The light years were diminishing! We were soon to become meteorites—fallen from the "Star Studded Sky" of Radford High. We realized that others would soon be taking our positions in the galaxy.

With a mist in our eyes and a tug at our heart strings, we glided down the aisle, the boys in blue; the girls in white. We were impressed by our Baccalaureate sermon.

Again we donned our caps and gowns. A sudden eclipse of regret passed over our radiant countenances—our last time together as a class!

With high hope for the future we lifted our eyes to the sky and thanked God for His living care through our light years.

CLASS PROPHECY

"Out of This World"

Before starting their space cruise from the Venable Zimmerman Planetarium, the two noted scientists, Thomas Smith and John Rutherford, completed a routine personal check-up of their rocket ship. They looked forward with much anticipation to their "Out of This World" tour which would take them to the planets to visit some of their old friends; and in order that their journey might be free from mechanical hazards they called upon the world's famous mechanics, Howard Turpin and Dwight Shorter to give the space ship a thorough check.

After careful planning and charting, Professor Smith took the controls and the little rocket headed toward Saturn (the planet with the rings around it). Here they found the former Barbara Clark, Joan Lewis, Nancy Alderman and Mary Alice Saul. The professors recalled that these girls had received their "rings" in 1951. They hadn't changed very much, for their charming families had kept them looking almost as young as they had looked when they graduated.

After a most enjoyable visit with these Saturnites, Professors Smith and Rutherford glided down "Rainbow Avenue" and decided to buy a car to use while they were on the planet. Bill Deck's ingenuity had brought forth the famous "Je Martina" Convertible which was equipped with the "no guide steering wheel." He must have been thinking of just such an invention in 1951.

At the "Stardust Playhouse" the professors were greeted by Donald Wilson who was just as affable and friendly as he had been as a senior at R.H.S. They were greatly impressed by the histronic ability of Anne Parsons and Janet Munier who played the leading roles in "Heavens Forbid." The play also featured the great ballet team, Slavenska Joyce Newcomb and Pavolova Ann King. They turned in a superb performance. The professors remembered their ballet attempts at the Cheerleaders' Dance.

Outside the playhouse a great commotion attracted Professor Rutherford's attention. Reaching the point of highest excitement, Professor Rutherford heard a clear voice shouting, "Try Pelter's hair dyes—You buy 'em—we dye 'em!"

As the two noted visitors sped down the avenue in the "no guide" convertible, they were unaware that they were not moving fast enough until they were halted by Fearless Jimmy Roberson, who was the chief skyway cop of Saturn. They thought that Jimmy would forget their traffic offense, but they forgot how the student patrol worked at R.H.S. and they found themselves holding a summons to appear before Judge Sebert Moran.

The next day the professors went to the "Jack Bird Stadium" to see a basketball game. The "Shooting Stars" featured Jimmy "Beak" Eaton and "Big Con" Browing and "Lefty" Pannell. They were still stars and were showing the same skill they had shown on the Bobcat team of 1951.

After the game they visited Dr. Robley Perrow's Hospital for All Alcoholic Robots. The Staff consisted of Josephine Stewart and Dot Henderson as head nurses, Dr. Barbara Sumner, famous obstetrician, and Marita Hoover, noted psychiatrist.

Visiting the opera at Ernie Alderman's Harmonic Concert Hall, the professors were entertained by Madam Joyce Crawford, famous soprano. Nancy Phillips is her manager and private secretary.

After the opera they stopped at Donald Dobbin's famous restaurant and enjoyed a wonderful meal called "Saturn's Star Steak Supper" prepared by Imogene McGinnis and Lois Jones who had earned a million just on this meal alone.

The weary professors drove back to the Hotel Tommy Howell and enjoyed a restful night under the "Joy Price Bedspread" and on the "outerspring" mattresses designed by William, the "Boo Boo" Jenelle. Ronnie Hendrix is the manager.

The next day they arose early and went on a shopping tour, for they had promised their wives a gift from Saturn. They were rather surprised to see Joyce Baker, who was modelling evening dresses. She was still as pretty as ever. Richard Baker was modelling the latest in classy

red suspenders and Mary Ward Tilley looked quite pretty in "Saturn's Stretchy Swim Suits."

Betty Jean Umberger who got her "ring" in '51 was shopping at the department store too. She was editor of the "Saturn Sunday Snooper," so she informed the professors of the latest gossip.

Darrell Wilson, world-famous architect, had just completed plans for beautiful ultra-modern homes for Marijane Nelson and Peggy Hammond.

Anne Morrow, "Miss World of 1961" became manager of the "Runabout Rockets" and has been touring the planets with them.

Mickey Landrum's athletic ability at R.H.S. won for her a place on the faculty of "Saturn's Streamlined School for Saints." After dealing with the little demons at R.H.S. she feels like she's in Heaven instead of on Saturn.

Doris Hill and Evelyn Amos have become famous for their "Atomic Hairstyles." They keep the Saturnites looking like movie stars.

Kinzer Otterman and Harvey Vaughn are operating a rocket service called "Silver Streaks." They sail through the air to help rockets in distress.

Carol Sutphin has become a famous lecturer. She probably got her start in English IV where she talked incessantly.

Betty Lee Dobbins has become a demonstrator for "Chink" Graham's "No-Cut Toe Mowing Machine."

"Jigger" Benson has found jobs for everybody. She went to R.P.I. and majored in occupational therapy. She is known as the "angel" to the unemployed.

Mildred Smith has become a food and clothing expert and Sonny Sutphin has just completed a lecture tour. He is a wonderful speaker.

All of this the professors learned from Betty Jean Umberger "Martin" who invited them to dine and dance with the Martins at "Club Brooks." James has been quite successful as a nite club owner.

After a short, but most enjoyable visit to the planet with the ring around it, Professors Smith and Rutherford jumped into their rocket and headed back to earth feeling confident that the seniors of '51 had all become stars of great brilliancy. All of them whom the professors had seen still kept alive the memories of their high school days for

"Old Memories never die—
They just fade away."

Our seven girls in white deserve much praise for the ease and grace with which they have led us in cheers for our teams. Whether the teams win or lose, the same spirit of good sportsmanship is always displayed by our cheerleaders, and we are really proud to say that they are from Radford. The same praise that is given to the girls should go to their faithful adviser, Miss Juanita Phillips.

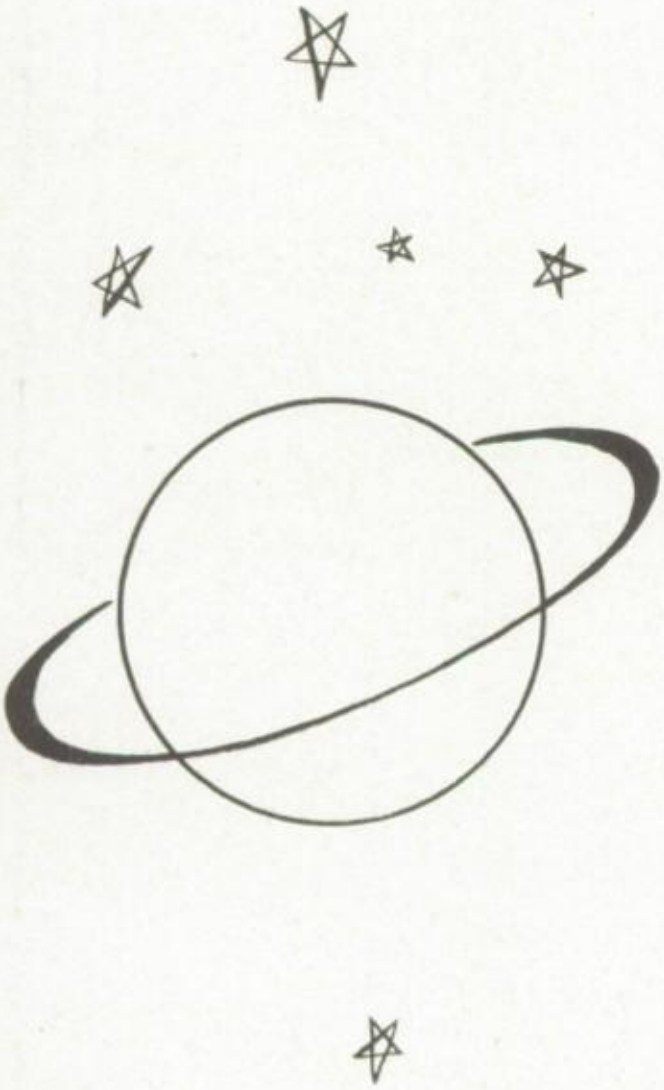
. . . REACHING FOR THE STARS

As we reach the zenith of our high school careers, we reflect with great pride upon the orbits that have been opened for us. By our own power and energy we have been able to climb upward, and to move forward to attain our goals. Our days at Radford High School have a special air of charm about them for they are the magic moments from which we form myriads of memories.

We realize that the future will be blurred by the nebulosity of war, and that the haze of hatred and greed must be replaced by a ray of light and peace.

We are but a minute part of this great universe, and yet we face tomorrow with high aspirations and great hopes that our generation will be able to illuminate the way for those who follow.

We *are* reaching for the stars but we are *not* losing sight of the brilliant memories which have made our life at Radford High our dreams of to-day and which will prepare up for tomorrow's world.



Congratulations!

WHAT MAKES A CHAMPION ATHLETE?

IS IT CONDITIONING. . . coaching . . . teamwork . . . physique . . . sportsmanship . . . competitive spirit . . . or just plain honest-to-goodness athletic skill?

We don't pretend to be athletic experts, because our job is to manufacture high quality textile products. But as sporting fans we think it would be safe to say that an athletic champion is the result of all these fine qualities.

We know that it has taken a combination of great leadership, manufacturing know-how, careful planning, employee loyalty, and skilled teamwork to make Burlington Mills a champion in the textile industry. The Company's many accomplishments and progressive growth during the past 27 years are well known. We are proud of this record and equally proud of our 32,000 employees who have worked together with real team spirit as members of the Burlington team.

It's a fact that Burlington's fine fabrics, hosiery and other textile products are truly *"Woven Into the Life of America"* — just as every Burlington plant is woven into the life of its own community.
